COURSEWORK / SKILLS

• Data Structures & Algorithms

• Operating Systems

• Artificial Intelligence • Web Development

• OOPS Concept

• Database Management System (DBMS)

PROJECTS

Employee Management System |

• Frontend: React.js, HTML, CSS, JS

• Backend: Java (Spring Boot, Spring MVC).

• Database: MySQL .

• Authentication: Spring Security with JWT.

• A full-stack Employee Management System (EMS) where HR/admin users can add, update, delete, and search for employees. Used Spring Boot to create RESTful APIs, integrated React.js for UI, and implemented JWT authentication for security..

TO-DO Application ☑ | HTML, CSS, Javascript

• using HTML, CSS, and JavaScript that allows users to add, update, delete, and mark tasks as completed. Tasks are stored in the browser's local storage, ensuring persistence without requiring a backend. The UI is styled using CSS Flexbox and Grid, and JavaScript handles DOM manipulation and event listeners for interactive functionality.

INTERNSHIP

Test Yantra Software Solutions (QSpider) \square

FEB 2025

Java Full-Stack Intern

Noida Sec-3, Uttar Pradesh

• A Java Full Stack Developer Intern is responsible for working on both frontend and backend development, gaining hands-on experience in software development, and collaborating with senior developers to build scalable web applications.

TECHNICAL SKILLS
